

Woodhouse. 1619.

**An Almanacke, or
Prognostication, for the
yeare of our Lord God.
1619.**

**Being the third after the
Leape yeare.**

**Containing sundrie rules, notes
and directions, very necessarie for
most sorts of men, serving indiffe-
rently for all this Kingdome
of great Britaine:**

**But more specially for the
famous and ancient Cittie of
Chichester, builded by Cissa,
the second King of the South
Saxons, about the yeare
of our Lord,
549.**

By John Woodhouse Philomath.

**Printed for the Companie of
Stationers. 1619.**

The common Notes, and moueable Feaste: according to the

English Account,

Roman Account.

1405	Gunnes first bled in England,	314
1460	Printing first in Europe,	159
1544	Bulloigne wonne by R. Henry 8.	75
1551	The Sweating sicknesse,	68
1562	The great Plague at New-hauen.	57
1569	Rebellion in the North,	50
1578	The great Snow,	41
1596	Cales Voyage.	23
1602	King James began March 24. whom God long preserve.	16

Of the Eclipses.

This yeare 1619. the two Luminaries, shall be both of them twice Eclipsed, neither of the Sunnes obscurations appearing to vs, but the 5. of January, the first shall be seene to them that be about Nouia Hispania, and Mare del Sur. The second, will be very great (the first of July) to the inhabitants of the Southerne parts of Africa.

The Moones first Eclipse, comes to our view, the 16. of July, neere halfe an houre after 10. at night, when she shall loose some part of her light, but wholly recouer it, about eleuen of the clocke.

The other of the Moone (being totall) happeneth the 10. of December, when about Midnight shee shall begin to be darkened, and immediately after 3. of the clocke, be free from the shadow of the Earth.

Of the 4 quarters of the Year.

The	Spring	beginneth	March 11.
	Summer		June 11.
	Autumne		September 13.
	Winter		December 12.

The Anatomie of mans body, as the
parts thereof be gouerned by the
12. Cœlestiall Signes.

Aries, the head and face : Taurus, necke and throat:
Gemini, armes and shoulders : Cancer, breast and stomacke:
Leo, heart and backe : Virgo, bowels and belly : Libra,
reines and loynes : Scorpio, secrets and bladder : Sagit-
tarius, thighes : Capricornus, knees : Aquarius, legs : Pisces,
the feete.

A Prognostication,
Containing the time and
reason of the names of diuers
Feasts, and other dayes in the
yeare, by which many olde writings
are dated : With perfect rules of
the Courts, both Temporall,
and Ciuill.

WITH
Certaine brieve Instructions
for Husband-men, necessary to be
obserued in tillage of the Land,
planting, gardening: with sow-
ing, gathering, and keeping
of seeds and fruits.

Also Naturall foreknowings of
the weather : with the Principall,
and most part of the Marrs and
Faires both in England and Wales:
Orderly set forth, with the Moneth,
day, and place where they be kept.

LONDON:
Printed for the Company of
Stationers. 1619.

which it openeth but foure dayes befoze.

A Prognostication.

Of Feasts.

The time of Advent (instituted by the Apostles) was so named, because part of the Church seruice in that time, concerneth the coming of our Sautour in the flesh, and to Iudgement.

The Epiphanie, of his appearing, first to the wise men, secondly in his Baptisme, & thirdly in his first miracle.

Septuagesima, so called of 70. as it were containing 70. dayes, which the Church doth obserue in remembrance of the 70. yeeres that the Israelites were vnder the Babilonicall seruitude.

Sexagesima, of 60. because that after 60. yeeres of the captiuitie, Cyrus gaue license to build againe the Temple of Jerusalem.

Quinquagesima, of 50. Dayes, Yeeres, Psalmes, Persons and Pence: from that Sunday to Easter are 50. dayes: the 50. was the yeare of Iubile. The Psalmes be in number thirtie 50. which signifie the time that the flood was vpon the face of the earth. Abraham demaunded if there were 50. righteous persons found in Sodoms, whether the Citie should be destroyed. The two debtors in the Gospell, of which the one owed 100. the other 50. Pence.

Quadragesima, of 40. dayes that Moses fasted, when he receiued the Law. Elias fasted as many: and so many fasted our Sautour before the Tempter came.

Lent, is called of the dutch word Lente, *id est*, the Spring or length, because then the dayes begtne to grow longer.

Ashtvednesday

Wood-house. 1619.

Ashwednesday, of *Asches*, quod ex veteri Ecclesie consuetudine, cum populus crucis signum recipiebat ex combustis cineribus Buxeis, seu linteis, quibuscum Christma absterfisset. *Minshaw*, in his Ductor in linguas.

The second Sunday in Lent, is sometime called Reminiscere, the third Oculi, the fourth Laetare, the fifth Iudica, or Passion Sunday. Palme-sunday of the branches of the Palme and Olive trees, that were cut downe and strowed in the way, when our Saviour came riding to Jerusalem. Maundy-Thursdai, of Mandatum magnum, quod discipulis suis dedit Seruator noster, de obseruatione coenae quod instituerat.

Easter, of the East, because at that time our Son of righteousness did rise, as the sun at the East. The first sunday after, is Dominica in Albis, or quasi modo geniti. The second sunday Miserecordia: the morrow (in these southerne parts) they call Hoc Munday. The third sunday Inlibate. The fourth Cantate. The fifth Vocem Iu. cundi, Rogation Sunday; or the Gange weeke, because of especiall deuotion, and prayer introyed by the Church, for a preparatiue to the topfull remembrance of Christs glorious Ascention, and the sending downe of the Holy Ghost, and that God might prosper the increase of all fruits, to the sustentation of his creature.

The Sunday after the Ascention day, Exaudi. Whitsuntide, *id est*, Albi solis tempus.

Trinitie, a Trina deitate in vna, viz. Patris, Filij, et Spiritus sancti.

Ember weeke, of the Saxon word, Emberen, to want the vse of, quod Ecclesia illo tempore nos carne carere iubebat.

Four times (about the yeare 212.) were appointed for these fasts.

1 2 3 4	After	{	The first sund. in Lent, Whitsunday, Holy Crosse, Septem. 14 S. Lucies day, Dec. 13.	}	the	{	Wednesday Friday, and Saturday.

The first day after euery of the Feasts set downe for
 euery Terme, the Court of the Arches is kept in the
 forenoone in Bow-church, and the Admirall Court the
 same day afternoone in Southwarke. The second day
 after euery of the said Feasts, the Audiance Court is
 holden in the Consistory in Paules in the forenoone,
 and the Prerogatiue Court, in the same place in the af-
 ternoon. The third day following euery of those feasts
 the Bishop of Londons Consistory Court is kept in
 Paules in the forenoone, and his Maiesties Court of
 Delegates in the same place in the afternoone. The
 fourth

Wood-house. 1619.

fourth after the foresaide Feast, his Majesties Court of High-commission, is kept in the Consistory in Pauls, Or (as it hath bene of late) every weeke in the Terme time, on the Thursday after none at Lambeth, but if any of the dayes before recited be Sunday, or any holly day, then is such Court holden the day following.

Note that in Hilarie Terme, foure of the aboue named Court dayes be ordinarily kept, and as many in Easter, and Trinitie Termes, according to the course of the yeare, and as the Judge in the Arches Hall thinke good, who at the end of every Terme, appointeth the Court dayes to be kept the next Terme: But in Michaelmas Terme the Court dayes for the same before set downe, are certainly kept. I therefore admonish all Countrey men, cited by any originall Proccesse to appeare in the Arches, Audience, Prerogative, or Delegates, to send to some Proctor, a note of the cause, and to what Court they be cited to appeare for them, and to returne them word of the very day, it shall be needfull for them to appeare in person. But the course of practise in the High-commission, and the Admirals Court is otherwise, for every person cited to those Courts, must appeare personally.

Oxford Itt beginneth the tenth of July.

Cambridge Commencement hapeneth the first of July.

Times prohibited from Marriage.

From	{ Advent Sunday Septuagesima Sund. before the Ascension }	until {	{ Eight dayes after the Twelfe-day. 8. dayes after Easter. Trinitie Sunday. }
------	---	------------	--

A Prognostication. Generall rules of Husbandry, Gardening, and Physicke.

Graft and plant trees the Moone being in Taurus, Virgo, & Capricornus, the fit time of the yeare considered, in the new of the Moone, the winde at South or West.

Remove and set young trees, in the first quarter of the Moone, the weather being warme and dry, and the winde not in the North, nor East, from October till February.

Set or sow all kinde of seedes, the Moone in Aries, Taurus, Cancer Virgo, Libra, Capricornus, Aquarius, or Pisces, but the seedes whose rootes be round, must be sowne or set three or foure dayes before or after the full.

Cut, and plash hedges, betwene the change & the full, from the end of January until the beginning of June.

Sheare Sheepe, cut haire, and sow all manner of corne in the increase of the Moone.

Geld Cattell, the Moone in Aries, Libra, and Sagittarius, before the full: it mattereth not when you let them bloud, if the signe be not in the heart, nor in the place where the incision is made, nor in the day of the change of the Moone.

Fell great Timber, in the last quarter, in December, and January is best, but if you would haue it to grow againe, cut it downe in the new of the Moone.

It is good to set all kinde of quicke-set from September vntill March.

Dung Land, that weede may not abound, in the last quarter.

Cut Vines in the end of January, in February, and in the beginning of March.

Purge, when the Moone is in a watery signe.

The best times to let bloud be, for the	{	Sanguine,	{	The	{	Pisces.
		Cholericke,		moone		Canc. Scor. Pisc.
		Melancholicke,		being		Libra or Aquar.

						Observations

Observations of Husbandry, and Gardening,
in euery Moneth of the yeare.

January.

Anuary, so called by Numa Pompilius, the second King of Rome, in honour of the two faced Ianus, is a fit time to trench Gardens with dongue, to plant and set all kinde of Nutche-sets, Rose-trees, Peaches, Filbeards, and Plumbs: To set, or sow Kernells, and Berries of all fruits, Bay-trees, Myr, and Boxe &c. And if the frost be not too hard, to remoue Trees, to set Rounstall-pease and Beanes, to rid frunt trees of superfluous branches, to lop trees and hedges, to brench, and to geld cattell for to reare, to fallow land for Wheate, and Rye. The best time to set, sow, remoue, prune, or lop, is before the fall. But sow Pease and Beanes, dongue land and fell great Timber, in the last quarter of the Moneth. In this moneth and the next, vse no physick but for great necessity: weare warme clothes and eate meates that be warme: Take heede of colde, or wet on your feete, especially if you be troubled with the rheume.

February.

February, was named also by Numa, of Februus, i. Pluto, to whom the olde Romans in this Moneth made sacrifice. Now set, cut, or lay Nutchsets, graft and remoue trees: Set and plant Vines, Myr, and Rose-trees. Sow Pease and Beanes, Kernells & Mustardsede, plash hedges, cast by ditches, and set Hops: proude now to haue sallades in Summer: and sowe Dates in colde and Wisse land.

March.

A Proghossication:

March.

MArch is named of Mars, the reputed Father of Romulus, and was then the first Moneth of the yeare. In the new of the Moone (the winde any part South or West, and the weather calme) graft, plant and sow that you left vndone the last Moneth: couer the rootes of your trees (which you bared before) with rancke earth: and if they be ouer-growne with mosse, dongue them with Swines dongue, and it will destroy the mosse. Sow Beanes, Pease, Oats, parsnips, Onions, Cucumbers, Melons, and all kinde of Pot-hearbs, slip hartthocks and Sage: geld lambs: plow Barly-land, and in cold clay sow it. Let blood according to your youth, strength and necessitie, the signe being fit. Whatsoeuer disease by Physicke cannot now be cured will hardly be rid all the yeare after.

April.

Aprill is called abaperiendo, because then the earth is opened, and poureth most plentifully out of her lap diuers treasures both of flowers and buds. In this Moneth, sow Barly, Hempte, Flaxe, and all kinde of seedes left yet vnsown. Dole Hops: set garden-hearbs: let Tanners now prouide them of barke: and all good huswines get them about their datres. Now by the order of a learned Physitian, you may bleede and purge: and they that haue aches, or be troubled with the gout, may goe to the Bathes in this Moneth, & the two next.

May.

Vhen Romulus saw his Citty of Rome much increased, he diuided the people into Maiores (vnto whom he dedicated this moneth) and Minores. Now set and sow all manner of fine hearbs & seedes: sow flaxe and hemp: weed cozne: set Stills to worke: take Lambs from

Wood-house, 1619.

from **Ewes**: stirre land for **Wheat** and **Rie**: leane lopping of trees: teach **Hop** to clime, but cut off the superfluous branches. Rise betime, and walke in fragrant fields, and by running **Creames**. Now **Sage** & **swete Butter** is an excellent breakfast, clarified **Whay** and **sage-He** a most soueraigne drinke.

Iune.

IVne, à Iunioribus, as the former à Maioribus, or à Iunone, because of the great honours done to her in this Moneth. Weed corne and gardens: sheare **Spey**: get home so well: set **Rosemary**, **Carnations**, and **Gillie** flowers: sow **Lettice** and **Raddish**, for now they will not runne to seede. Make hay, and cut neither hedge nor tree during this and the two next Moneths. Beware of great thirst: vse light, thin, and coole dyet.

Iuly.

IVly (at the first Quintilis) hath the name of **Iulius Caesar**, the first Monarch of the **Romane Empire**, who was borne in this moneth. Now apply making of hay: fallow land for **Wheat**: pull hemp that is ripe: gather **Garden-beanes**: get **Rye** and **Wormwood** to strew on floors, to drive away fleas and moths. Gather flowers and lay them in the shade till they be almost dry, & then sunne them a little for feare of corruption. Take heed of sodaine colds: for beare **Lettice**, and let not bleeding be but for urgent necessitie.

August.

AVgust (before Sextilis) by a decree of the Senate, was so named in honour of **Augustus Caesar** the second Emperour. Now reape wheat & **Rie**: sow winter hearbs in the new of the moon: gather garden seeds: cut down oats: for beare sleep after meat, vse moderate diet, and beware of all meates and spices that be inflaming.

September.

A Prognostication.

September.

September, of Septem (being the seauenth from March) and Imber, a smooking shower of raine, which in this and the thre Moneths following, falleth ofttest in all the yeare. In this Moneth gather Hops and fruits: make Merince, kill Bees, sow Wheate and Rye in strong and cold clay land: sow Parsnips and Carots: remoue and set slips of all kindes of flowers betwene the two Lady-daves, and remoue trees euery new moon till Februarie: set Roses, Strawberries & Warberies: bath in hot bathes for cold causes, let blood, and take Physicke according to necessitie.

October.

October, of Odo (the eight from March) and Imber. Now sow Wheate and Rye, the sooner the better for feare of raine. Sow Icornes and Fruits: gather winter fruit, the weather dry in the after-noon, the Moone being past the full: cut Rose-trees, to haue stozs of Roses, but once in two yeares: vse meates that are most strong and nourishing: drinke Beere or Ale of indifferent strength: Get warme cloathing, and goe dry shod.

November.

Nouember, of Nouem and Imber, being the ninth Moneth from March. Now is the best time to make Malt, to kill Hogs: to sow Hasting-pease, to trench gardens with dongue: to set Crabtree stockes, and to make Martinmas Beefe. In hot grounds sow Wheat and Rye: vse wholesome meates and drinckes: and good exercise to preserve health,

December.

December.

December, of Decem and Imber, the tenth Moneth, and last of Romulus his yeare. In this and the next moneth cut downe great timber in the els of the moon, vncouer the roots of fruit trees, fallow land for barley: set Beanes and Pease: couer hearbs from cold: looke well to cattell: rake sowles with nets and lime-twigs: let horses bloud on S. Stephens day. Let your meat be hot and nourishing, but not such as breedeth Melancholie. The warmth of your body, (next to cloathing) let it euer procede from exercise that is moderate: for in this Moneth that body can hardly be found, whose thinnes are made pyed and motley with scorching of the fire.

A most necessary Obseruation for the
sowing of Garden-seeds.

All Pot-herbs must be sowne thick, and but thinly covered: not aboue three fingers. All hearbes which cabbage must be sowne thicke, and deeper covered, as a handfull at the least, and in their remouing planted thin, and well fixed into the earth. All rootes must be sowne deepe and thin, almost a fote, either let into the ground, or strewed in deepe furrowes, digged and laid vp for the purpose, after the quantitie of your seede. If you sow hardly a handfull, then may you set them one by one into the ground: but if you sow a great quantitie, turne by your earth into deepe furrowes, and in the bottome thereof scatter your seede, and then rake it into a leuell, and you shall not onely saue much labour, but reape much profit.

A Prognostication.

Of gathering and preferuing of fruits.

Cherries of all fruits (for the most part) be soonest ripe, but not all at one instant: the reddest be alwayes the ripest, & must be gathered by the stalks and handled as little as may be: lay them as thin as you can, lest by taking heat, they soon lose the glory of their colour.

Plums, when no part of the fruit cleaves to the stone, be perfectly ripe: gather them before they fall downe of themselves: they will be preserved long being spread thin vpon Nettles or Vine-leaves.

Pears must be gathered when they haue their full growth, which is when the kernels be hollow in the core, and are blacke on the end: to haue them last the longer, lay them one by another vpon a boarded floore, or flake made with wands, without straw or fern.

Apples, being by gathered (those that be winter-fruit in the old of the Moone) will be best kept, if euery sort be laid by it selfe, (without any fallings among them) vpon bare boards, or a plaster-floore, till S. Andrews tide, the thinner they lye the better: the place must be somewhat close, but not on the ground. In frost couer them thicke with fine hay or barley chaffe.

Wardens will last longest being laid vpon dry boards, without any couering.

Naturall Coniectures of faire weather.

Vhen the Sun riseth cleare and not red, and is red at his setting: when the Moone at her Prime (which is thre dayes and eightene houtes after her change) appeares faire & bright: when there is a Rainbow presently after raine: when mists
come

come downe from the hills, & settle in the vallies: mist in the evening rising vp from the water: Crows and Ravens gaping against the Sun: if flies and gnats houer together about the beames of the Sun before it set, making as it were the forme of a pillar: if the North winde blow strong: if the Owle doe whoope much, and not scritch: if Bats flye busily after Sunne-setting: if Cranes flye high, and Water-fowles lie farre off from the water, All these are certain signes of faire weather.

Signes of Raine and foule weather.

If the Sunne be fiery red at his rising: if a little after he is vp, he be couered with great thick clouds: if at his setting hee be ouer-cast with a thicke mist, or goe downe behinde a great cloud: if the hoines of the new Moone be blunt: if blackishnesse appeare in the middest of her: if two Rain-bowes be seene together: when bells are heard further then vsuall: when wainescot doores, and wooden couerings open straiter then of custome: if Swine and Peacocks make a great noise, when birds be busie in washing & pruning themselves: crying and making a great noise about the water: the continuall and timely crying of the Crow: Moles heaving busily: Cattell eating greedily, and licking their hoofes, breathing into the ayre: when Bees flye not far from their hives: when the Cocks doe crow by night more timely then they were wont: if the sea doe swell, and flow higher then ordinary: the chirping of Sparrowes early in the morning: the blustering noise of trees and leaues in the Woods: if in the beginning of winter small birds doe flocke together in the fields: if the winde blow hard in the South, & presently change to the North: it is a token of a very great tempest vpon the sea very shortly after.

The

**The principall Faïres of *England* and *Wales*,
the moneth, day and place, where they be
kept, more largely set forth
then heretofore.**

Ianuarie.
